SUMMARY

AI Application Engineer and Forward Deployed Engineer building production Gen-AI and agentic AI applications - spanning RAG pipelines, multi-agent orchestration, and prompt engineering with LangChain and LangGraph, exposed through FastAPI services. Background spans machine learning and computer vision to full-stack development, backed by industry internship experience and multiple hackathon wins.

TECHNICAL SKILLS

- **Languages:** Python, Java
- **GenAI / Agentic AI:** LangChain, LangGraph, RAG pipelines, multi-agent orchestration, prompt engineering
- **ML / CV Frameworks:** PyTorch, PyTorch Lightning, TensorFlow, YOLOv8, C3D, SlowFast, Bi-LSTM
- **Backend / APIs:** FastAPI, REST API integration, CAP services
- **Frontend:** React, Next.js, React Three Fiber, Streamlit, Svelte
- **Other:** Machine Learning, Computer Vision, NLP, Version Control, SAP BTP (working knowledge)

EXPERIENCE

Forward Deployed Engineer / AI Application Engineer | Infosys

July 2024 - Present

- Build production GenAI and agentic AI applications for an enterprise client, using LangChain, LangGraph, and RAG pipelines exposed through FastAPI and CAP services.
- Designed and shipped three production AI agents - a Search Agent, a Troubleshooter Agent, and an Audit Security Agent - all published to the SAP Business Accelerator Hub by SAP itself.
- Contributed to a multi-agent orchestration solution enabling a physical robot to navigate and act on agent instructions for warehouse operations; work showcased at an SAP SAPHIRE 2026 industry event.
- Applied prompt engineering and multi-agent orchestration to integrate GenAI workflows with enterprise APIs; hands-on exposure to SAP BTP and CAPM as the underlying enterprise platform.

Machine Learning Intern | Progint Software Solutions

Oct 2023 - June 2024

- Developed a real-time shoplifting detection system using action recognition models (C3D, SlowFast, Bi-LSTM) and an AI-powered cart tracking system using YOLOv8 to monitor customer movements and automate virtual cart updates.
- Improved retail security and customer convenience by reducing theft incidents and enabling seamless, AI-driven shopping.

HACKATHONS & ACHIEVEMENTS

- **Winner - Progint's Computer Vision 2K23 National Hackathon, Alliance University, Bangalore (2023):** Built a smart cart system using hand gesture detection and real-time vision analytics to automatically add products to a virtual cart.
- **1st Runner-up - SheCodes by WTM Reva, Reva University, Bangalore (2024):** Designed an AI-powered e-learning platform with React Three Fiber and Llava-8B for adaptive, real-time learning.
- **1st Runner-up - HackQuest by I-Quest, VIT-AP (2024):** Built an AI-powered traffic management system using YOLO, OCR, and OpenCV to automate violation detection.
- **1st Runner-up - FrameX Web Hackathon by CSI, VIT-AP (2024):** Built a job-search platform with ReactJs, improving the job-matching process for candidates and recruiters.

PROJECTS

- **E-learning Platform (Llama3 & LLaVA):** 3D virtual AI teacher using React Three Fiber; facial emotion recognition adapts teaching style; supports text and voice input. Tech: Ollama (Gemma 2b, LLaVA), LangChain, FastAPI, React Three Fiber, Tesseract OCR.
- **Raftaar.ai - AI for Traffic Challans:** Automated traffic violation detection, fine generation, and reporting. Tech: React.js, Flask, YOLOv8, Tesseract OCR.
- **StressBreak - Mental Health Journal:** Sentiment-analysis web app offering personalized music, food, and exercise recommendations with mood tracking.
- **Physical AI Agent - Warehouse Fulfillment:** Contributed to a multi-agent orchestration solution enabling a physical robot to navigate a warehouse and execute fulfillment actions based on agent instructions; published and showcased at SAP SAPHIRE 2026.

EDUCATION

Bachelor of Technology in Computer Science

Vellore Institute of Technology (VIT), Andhra Pradesh | August 2021 - May 2025

Key Competencies: Data Structures and Analysis of Algorithms, OOPS, Database Systems (SQL) and Administration

CERTIFICATIONS

- Claude Certified Architect - Foundations
- Artificial Intelligence and Machine Learning Certification | SmartInternz
- MERN Certification | ETHNUS
